#Professional Experience

Utopia Tech Solutions / Full Stack Developer

August 2018 – Current | Atlanta, GA

- Developed a website for Mr.QuickPick with the goal of projecting a better brand image and increasing annual revenue by 25%.
- Integrated, customer experience data collecting survey app for a private healthcare center, which reduced customer complaints by 40%.
- Guided and Led the development of a WordPress based E-commerce website for our client AbyssiniaComputech, achieving 60% increase in customers.
- Successfully carved out PSD design and convert to custom themes per client specifications.
- Effectively designed, deployed and integrated high profile database using MySQL.
- Successfully wrote Node modules to manage survey logic.
- Completed an integration of student discussion platform that has over 1000 users.
- Collaborated with a talented team of backend developers including driving all client facing applications.

Freelance / Frontend Developer

June 2017 – August 2018 | MD, USA

- Collaborated with clients/content owners to understand their requirements, manage expectations, and develop a system/design solution for existing and new websites.
- Presented new UI and templating system with Bootstrap and JavaScript to improve UX to a restaurant which helped bring in 300 more customers per month.
- Advised clients to reduce page loading time of website by 20% through JavaScript compression and CSS minification.

Personal Projects

- Built Instagram replica using React.js and Firebase which lets users create an account, post images, and leave comments on other posts.
- Authored Zoom replica using Node.js. so that two or more users can go online and meet face to face.
- Recreated responsive live website of apple.com using React.js and integrated Apple's YouTube channel with the website using API. View code on GitHub.
